🚀 Big Milestone for VoltaGrid & Halliburton
Proud to announce a major step in our collaboration with Halliburton: securing manufacturing for 400 MW of modular natural gas power systems for delivery in 2028 to support hyperscale data center growth across the Eastern Hemisphere.

As global demand for AI and cloud infrastructure accelerates, so does the need for reliable, scalable, lower-emission power. Together with ...more

Experience

Senior Automation Engineer
VoltaGrid · Full-time
Nov 2025 - Present · 6 mos

• Leading controls and automation integration for VoltaGrid's next-generation natural-gas microgrid deployments.

• Designing and deploying multi-LLM agent orchestrations and workflows using OpenClaw, GPT-5.4 API, GPT Codex, Claude Code, Claude Opus/Sonnet APIs, Gemini API, and Cursor AI to deliver tailored solutions for the development, integration, and deployment of full SCADA platforms and IEC 61131-3 automation systems, reducing project lifecycles by up to 80%.

• Working across SEL PowerMax master controllers, Jenbacher engine control platforms, and distributed I/O to ensure reliable multi-MW power system operation.

• Coordinating multi-vendor systems (SEL, INNIO Jenbacher, and networking teams) to establish a unified controls architecture.

• Supporting HIL (Hardware-in-the-Loop) test preparation and system

validation workflows.

• Reviewing and shaping internal engineering specifications, communication standards, and control-system requirements for upcoming projects.

• Supporting the design of redundant control layers, OT network segmentation, and commissioning readiness for utility-grade power systems.

• Providing field-facing technical leadership, controls troubleshooting, and cross-discipline alignment between electrical engineering, operations, and external OEMs.

R&D – AI Agents for Industrial Automation
Freelance
Sep 2025 - Nov 2025 · 3 mos
Houston, Texas, United States · On-site

• Developed domain-specific LLM agents and multi-agent systems to enhance knowledge retrieval and project alignment.

• Prototyped agent frameworks utilizing OpenAI Agents SDK and other advanced technologies for efficient AI integration.

• Designed edge-AI solutions for PLC/SCADA systems, enabling near-real-time data inference and decision-making.

• Built Python-based applications integrating APIs for WTI oil, equities, and market data.

• Developed agentic bots for real-time monitoring and automated trade execution.

• Implemented trading logic using RSI, moving averages, and risk controls (stop-loss, position sizing)

Automation Consultant | Technical Advisor | Programmer
AWC, Inc. · Full-time
Feb 2004 - Sep 2025 · 21 yrs 8 mos
Houston, Texas, United States · On-site

• Delivered $23.5M in automation, electrical, controls and power generation sales (2023–2024).

• Led multi-party negotiations and presented solutions to senior customer stakeholders.

• Prepared technical scopes, BOMs, cost estimates, and final contractual documentation for proposals.

• Owned key accounts and served as primary commercial and technical point of contact.

• Negotiated special pricing agreements and commercial terms with Siemens and other OEMs for clients.

• Set pricing and margins autonomously, managed vendor rebates, credit terms, partner relationships.

• Coordinated cross-functional delivery teams to ensure profitable execution and on-time startup.

• Led Siemens PLC/SCADA/DCS design and integration (TIA Portal, S7-1500, S7-1200, S7-300, WinCC).

• Integrated Siemens automation with OEM natural-gas engines for mobile power units (2.5 – 35 MW).

• Architected IEC 61850 SCADA, switchgear, relay coordination, and mobile substation solutions.

• Implemented hazardous-area control systems to NEC / ATEX / IECEx Zone 1–3 standards.

• Initiated LLM agent prototyping for industrial automation workflows to accelerate business processes.

• Drove new business development for Siemens SCADA, MES, and Digital Enterprise solutions.

• Programmed, commissioned, and troubleshot PLCs, HMIs, SCADA, DCS and industrial networks.

• Developed internal software to automate business processes and deployed/support VoIP systems.
